Professional Summary

Cum Laude Computer Science graduate with a strong foundation in hardware diagnostics, Windows and Linux systems, networking, and technical support. Proven experience resolving technical issues in fast-paced, zero-downtime environments, combining rapid troubleshooting with high-touch customer service. Dedicated to leveraging IT infrastructure to support mission-driven teams and ensure reliable technology for all end-users.

Technical Skills

Hardware: Server Assembly, PC Hardware Installation, Hardware Troubleshooting, Component Replacement, System Testing, Diagnostics, Qua
Inspection, ESD Procedures
Operating Systems: Windows Server, Windows 10/11, macOS, Linux/Unix (Ubuntu, CentOS, Kali), iOS, Android
Networking: TCP/IP, DNS, DHCP, Active Directory, VPN, Router Configuration, Wi-Fi Setup
IT & Support Tools: Microsoft 365 (Exchange, Teams, SharePoint), GoTo Resolve, TeamDynamix, ServiceNow (Familiarity)
Scripting & Programming: Python, SQL, JavaScript, PowerShell, Bash, Kotlin
Platforms & Frameworks: AWS, GitHub, Microsoft Visio

Professional Experiences

Server Assembler | JABIL | May 2026 – Present

- Assembled enterprise server hardware following engineering work instructions and strict quality standards.
- Installed CPUs, memory modules, storage drives, power supplies, and other vital server components.
- Performed functional testing and verified system readiness before production completion.
- Identified hardware issues, effectively troubleshooting and replacing defective components to ensure hardware reliability.
- Followed ESD, quality, and safety procedures in a high-volume manufacturing environment.

IT Infrastructure and Operations - ESPN Production Crew | Northern Kentucky University | Aug 2024 – Dec 2025

- Provided high-touch, on-site technical support for live sports broadcasts, assisting with cameras, A/V systems, and production equipment in a zero-downtime environment.
- Troubleshot hardware, software, and basic network connectivity issues during live events to minimize disruptions for production teams.
- Assisted in setup, configuration, and teardown of broadcast equipment, mobile devices, and Windows-based systems
- Collaborated seamlessly with production and technical teams, translating technical issues clearly for nontechnical staff to ensure the smooth execution of live events.

Teaching Assistant | Introduction to Linux | NKU Aug 2024 - May 2025

- Collaborated with professor in course material preparation and conducted lab/study sessions.
- Independently led a class of 25 students on Linux File Permissions, using real-world scenarios to demonstrate the importance of access control and security.
- Assisted professor with grading, curriculum support, and performance tracking.

Student Union Operations Assistant Jun 2023 - Dec 2025

- Supported Windows workstations, A/V systems, printers, and various network-connected peripheral devices across campus facilities.
- Maintained detailed incident management records using TeamDynamix and GoTo Resolve, ensuring timely updates, triage, and resolution for end-user requests.
- Modeled outstanding customer service by assisting faculty, staff, and students of diverse demographic backgrounds with technical issues.

Education

Bachelor of Science in Computer Science (Minor: Computer Information Technology) | **Dec 2025**

Northern Kentucky University, Highland Heights, KY **Honors: Cum Laude** (GPA: 3.61 / 4.0)

Relevant Coursework: Data Structures & Algorithms, Database Systems, Object-Oriented Programming, Mobile App Development, Software Engineering, Artificial Intelligence, Machine Learning.

Projects

NKU Find It - Campus Lost & Found Web App - SE | React, TypeScript, Django, SQL Oct 2025 - Dec 2025

- Designed and developed full-stack web application enabling users to report, search, and claim lost items using React, TypeScript, Django, and SQL.
- Built responsive frontend with filtering and search logic to enhance end-user experience, backed by a structured relational database schema.

Network Topology - Network Topology Mapper, Professor: Er. Matthew Grubbs Aug 2023 - Dec 2023

- Led a team in designing an optimized network topology for multi-branch data flow, providing technical guidance and fostering collaboration to overcome structural network challenges, ensure adherence to routing best practices, and complete the project on time.
